

Columbus, Georgia is a Global Leader in Aerospace Manufacturing

“Georgia is a top five exporter of aerospace products in the U.S., totaling \$9.2 billion in 2022 alone. From the flights that go through the world’s most utilized airport to the engines in the airplanes, the Peach State is crucial to moving goods and products,” says Georgia Governor, Brian Kemp.

In Columbus, Pratt & Whitney is leading this growth with the recent announcement of a \$208 million expansion. McCauley Propeller Systems enhances this ecosystem, crediting community support and the strong workforce with ongoing success. “The opportunity to grow here is huge. The community really loves aerospace and we can start recruiting in high school,” said Greg Payne, Plant Manager of McCauley.

In addition to a ready workforce, Columbus offers aerospace manufacturers:

- Affordable, diverse energy supply with renewable options
- Financial incentives
- Existing buildings and shovel-ready sites
- Trained workforce with manufacturing expertise
- Columbus Airport
- Central location near aerospace manufacturers
- Outdoor recreation, a vibrant downtown, strong schools & entertainment options for employees
